

Hevada DSF300-V6-CV5,5 Dust extraction unit

M002940

- ✓ Year of construction 2021
- ✓ As from march 2026

**Technical Data**

Central extraction unit with negative pressure

- capacity 27,000 m³/h
(expandable to 36,000 m³/h)
 - As per norms ATES 153 / St1
 - total installed power: 34.10 kW
 - 6 fans in cascade
 - filter surface 300m²
 - compressed air cleaning
 - Suction pipe diameter 400mm
 - sluice filter (2x rotary sluice)
Connection outlet diameter 200mm
 - Siemens control cabinet
 - 2 hot air recovery ducts 700 x 700 mm
with summer/winter valve
consisting of 3 parts
- dimensions (installed): 7.5 x 2.45 x 7.5 m
weight: approx. 7,000 kg
